

TEST SCENARIO SPECIFICATION

Document ID	OC-LOG-TS	Version	1.0
Project	OpenCart Platform	Module	User Login
Techniques	EP · BVA · Decision Table	Status	Ready for Review
Total Scenarios	9 Test Scenarios	Prepared By	Mohamed Ahmed

SCENARIOS SUMMARY

Scenario ID	Title	TC	Category
TS-CORE-001	Core Login Flow	4	Functional
TS- EMAIL-002	Email field validation	8	Validation
TS-PASS-003	Password field validation	3	Validation
TS-FPASS-004	Forgotten Password Flow validation	8	Validation
TS-LOGOUT-005	Logout Flow	6	Validation
TS- PERF -006	Performance and Resilience	3	Performance
TS- SEC -007	Input Security	3	Security
TS- USE -008	Login Form Usability	5	Usability
TS- COMP-009	login Page is Fully Responsive	3	Compatibility

TEST SCENARIOS — DETAILED SPECIFICATIONS

1. CORE LOGIN FLOW

TS-CORE-001	Validate Core Login Flow
-------------	--------------------------

Given the user is on the Login page And the application is accessible and running When the user enters "<Email>" And the user enters "<Password>" in the Password field And the user clicks "Login" Then the result should be "<Result>"
--

Case	Email	Password	Result
Valid Credentials	test@domain.com	Test123!	Redirected to My Account — dashboard fully rendered
Session Persistence	test@domain.com	Test123!	Session remains active — account details and order displayed
Empty Fields	(empty)	(empty)	Form not submitted — validation error messages displayed

TS-CORE-001	Validate Redirect authenticated users away from login page
-------------	--

Given the user is already logged in When the user navigates to the login page URL Then the user should be automatically redirected to the My Account page And the login page should not be displayed
--

2. Email Validation

TS-EMAIL-001	Email field validation
--------------	------------------------

Given the user is on the Login page And the Password field contains a valid password "Test123!" When the user enters "<Email>" And the user clicks "Login" Then the result should be "<Result>"

Case	Email	Result
Missing (empty)	(empty)	validation error should appear on the field and login should be blocked.
Missing '@' Symbol	testdomain.com	validation error should be displayed and login should be blocked.
Missing Domain	test@	validation error should be displayed and login should be blocked.
Disallowed Characters	te#st@domain.com	validation error should be displayed and login should be blocked.
Case-Insensitive	TEST@DOMAIN.COM	the system should treat the email as case-insensitive and allow login to proceed
Leading Space	(space)test@domain.com	the system should trim the spaces automatically and proceed with validation
Trailing Space	test@domain.com(space)	the system should trim the spaces automatically and proceed with validation
Unregistered Email	notfound@domain.com	validation error should appear on the field and login should be blocked

3. Password Validation

TS-PASS-001	Password field validation
-------------	---------------------------

Given the user is on the Login page
And the Email field contains a valid email "test@domain.com"
When the user enters "<Password>" in the Password field
And the user clicks "Login"
Then the result should be "<Result>"

Case	Password	Result
Missing (empty)	(empty)	Rejected — Warning: No match for E-Mail Address and/or Password
Wrong Password	wrong pass	Rejected — Warning: No match for E-Mail Address and/or Password
Case-Sensitive Password	TEST123 (correct:test123)	Rejected — Warning: No match for E-Mail Address and/or Password

4. Validate Forgotten Password

TS-FPASS-001	Forgotten Password Flow validation
--------------	------------------------------------

Given the user is on the Login page or Forgotten Password page
And the application email service is running
Given the user is on the "<Location>"
When the user enters "<Input>"
And the user clicks "<Button>"
Then the result should be "<Result>"

Case	Location	Input	Button	Result
Link Visibility and Redirect	Login page	—	Forgotten Password	Link visible — redirected to Forgotten Password page
Valid Registered Email	Forgotten Password page	registered@domain.com	Continue	Confirmation shown — reset email received within reasonable timeframe
Unregistered Email	Forgotten Password page	notfound@domain.com	Continue	Rejected — E-Mail not found in records — no reset link sent
Login with New Password	Login page	valid email + new password	Login	Accepted — redirected to My Account
Login with Old Password	Login page	valid email + old password	Login	Rejected — Warning: No match for E-Mail Address and/or Password
Expired Reset Link	Forgotten Password page	expired link	Reset link click	Rejected — expiry error shown — prompted to request new reset link
Reset Link Used Twice	Forgotten Password page	already used link	Reset link click	Rejected — error shown — prompted to request new reset link
Expired Reset Link	Forgotten Password page	registered@domain.com	Continue	Resend option available — resent email delivered successfully

5. Validate Logout

TS-LOGOUT-001	Logout Flow validation
---------------	------------------------

Given the user is logged in with an active session
And the user is on the My Account page
Given the user is in state "<Starting State>"
When the user performs "<Action>"
Then the result should be "<Result>"

Case	Starting State	Action	Result
Logout and Redirect	Logged in — My Account	Clicks Logout	Session terminated — redirected to logout confirmation — success message
Continue After Logout	Logout confirmation page	Clicks Continue	Redirected to platform home page
Browser Back Button After Logout	Logged out	Presses browser Back button	Account pages not accessible — redirected to Login page
Direct URL Access After Logout	Logged out	Navigates to protected URL	Redirected to Login page — access denied without re-authentication
Multi-Tab Logout	Logged in across multiple tabs	Logs out from any tab	All other tabs terminate session — redirected to Login page
Multi-Browser Logout	Logged in on multiple browsers	Logs out from one browser	Session in all other browsers terminated — redirected to Login page

6. Performance Validation

TS-PERF-001	Validate Login Performance and Resilience
-------------	---

Given the user is on the Login page
And the user has valid credentials "test@domain.com"
When the user enters valid credentials
And the user clicks "Login"
Then the result should be "<Result>"

Case	Condition	Result
Normal Load Response Time	Network available	Authentication and redirection complete within 3 seconds
No Network Connection	Network unavailable	Connection error displayed — user prompted to check internet and retry
Slow Network (3G)	Slow network connection	Loading indicator shown — Login button disabled during request — completes on retry

7. Input Security Validation

TS-SEC-001

Validate Login Input Security

Given the user is on the Login page
And the application is running over HTTPS
When the user enters "<Input>" into the "<Field>"
And the user clicks "Login"
Then the result should be "<Result>"

Case	Field	Input	Result
SQL Injection	Email / Password	' OR '1'='1	Rejected or sanitized — no DB error — generic message — application stable
XSS Attack	Email / Password	<script>alert(1)</script>	Sanitized or rejected — no script executes — no alert — no code stored
Password Field Masking	Password	Any character	Characters masked — no plain text visible — not exposed in DOM or source

8. Login Form Usability Validation

TS-USE-001

Validate Login Form Usability

Given the user is on the Login page
When the user performs "<Action>"
Then the result should be "<Result>"

Case	Action	Result
Clear Error Messaging	Submits form with invalid fields	Specific error near relevant field — no system logic exposed — contrast compliant
Password Visibility Toggle	Opens page on Chrome or Edge	Custom toggle visible — not browser-native — reveals and masks password on click
Keyboard Navigation Tab	Presses Tab	Focus moves forward logically through all fields and buttons
Keyboard Navigation Shift+Tab	Presses Shift+Tab	Focus moves backward logically through all fields and buttons
Keyboard Submit Enter	Presses Enter	Form submitted successfully

9. Compatibility Validation

TS-COMP-001	Validate login Page is Fully Responsive on Mobile Devices
-------------	---

Given the user is accessing the Login page Given the user is on "<Device>" with screen condition "<Condition>" When the Login page loads Then the result should be "<Result>"

Case	Device	Condition	Result
Mobile Responsive Layout	Mobile (320px–480px)	Page loads	No horizontal scroll — single column — tappable buttons — readable font — no overlaps
Tablet Responsive Layout	Tablet (768px–1024px)	Portrait and landscape rotation	Layout adapts — spacing consistent — elements not stretched — touch targets accessible
Browser Compatibility Chrome/Edge	Chrome / Edge	User enters credentials and logins	All UI elements render correctly — validation consistent across both browsers

DEFINITION OF DONE

✓	All Test Scenarios Executed and Passed
✓	No Critical / High Defects Open
✓	Cross-browser Compatibility Verified
✓	Performance Meets SLA (≤ 3s response time)
✓	Security Checks Passed (SQL Injection & XSS)
