USER STORIES — DETAILED SPECIFICATIONS

OC-LOG-US-001

Core Login Flow

As a *registered customer*, I want to enter my email and password and click Login, so that I can access my account and use platform features

AC ID	ACCEPTANCE CRITERIA
AC-01	Given I am on the Login page and have entered a valid registered email and correct password, When I click Login, Then I should be redirected to My Account page, and my dashboard should be displayed
AC-02	Given I am logged in and navigate to My Account, When the page loads, then my account details and order history should be accessible, and my session should remain active.
AC-03	Given I am already logged in and navigate back to the login URL directly, When the page loads, Then I should be automatically redirected to My Account without being asked to log in again
AC-04	Given I have left both the Email and Password fields empty, When I click Login, Then the form should not be submitted and validation error messages should be displayed

OC-LOG-US-002

Email Field Validation

As a *returning customer*, I want the system to validate my email input on the login form, so that I receive clear feedback when my input is incorrect.

AC ID	ACCEPTANCE CRITERIA
AC-01	Given I have left the Email field empty, When I click Login, Then a validation error should appear on the field and login should be blocked.
AC-02	Given I have entered an email missing the @ symbol, missing the domain, or containing disallowed characters, When I click Login, Then a format validation error should be displayed and login should

AC-03	Given I have entered correct credentials with different letter casing in the email, When I click Login, Then the system should treat the email as case-insensitive and allow login to proceed
AC-04	Given I have entered an email with leading or trailing spaces, When I click Login, Then the system should trim the spaces automatically and proceed with validation
AC-05	Given I have entered a correctly formatted email that is not registered in the system, When I click Login, Then the system should display: "Warning: No match for E-Mail Address and/or Password" and login should be rejected

OC-LOG-US-003	Password Field Validation
---------------	---------------------------

	<i>As a returning customer, I want the system to validate my password input on the login form, so that I receive appropriate feedback when the field is incomplete or incorrect</i>
---	--

AC ID	ACCEPTANCE CRITERIA
AC-01	Given I have left the Password field empty, When I click Login, Then a validation error should appear on the field and login should be blocked
AC-02	Given I have entered a valid email but an incorrect password, When I click Login, Then login should be rejected and a generic error message should be displayed: "Warning: No match for E-Mail Address and/or Password" without revealing which field is wrong.
AC-03	Given I have entered correct credentials with different letter casing in the password, When I click Login, Then the password should be treated as case-sensitive and login should be rejected with a generic error message

OC-LOG-US-004	Forgotten Password
---------------	--------------------

	<i>As a returning customer who has forgotten their password, I want to access a password recovery option from the login page, so that I can regain access to my account.</i>
---	---

AC ID	ACCEPTANCE CRITERIA
AC-01	Given I am on the Login page, When the page loads, Then the "Forgotten Password" link should be visible and accessible, and clicking it should redirect me to the Forgotten

	Password page
AC-02	Given I am on the Forgotten Password page and enter a valid registered email and click Continue, When the request is submitted, Then the system should confirm a reset email has been sent and I should receive it within a reasonable timeframe
AC-03	Given I am on the Forgotten Password page and enter an email that is not registered, When I click Continue, Then the system should display: "The E-Mail Address was not found in our records, please try again!" and no reset link should be sent
AC-04	Given I have successfully reset my password, When I enter my email and the new password and click Login, Then I should be authenticated and redirected to My Account
AC-05	Given I have successfully reset my password, When I enter my email and the old password and click Login, Then the system should reject the login and display: "Warning: No match for E-Mail Address and/or Password."
AC-06	Given I have received a password reset link via email, When I attempt to use the link after its expiration period, Then the system should reject it, display an appropriate expiry error message, and prompt me to request a new reset link

OC-LOG-US-005	Logout
---------------	--------

*As a **logged-in customer**, I want to log out of my account, so that my session is terminated and my account is protected.*

AC ID	ACCEPTANCE CRITERIA
AC-01	Given I am logged in and navigate to My Account, When I click Logout, Then my session should be terminated, I should be redirected to the logout confirmation page, and a clear success message should be displayed
AC-02	Given I have logged out, When I click Continue on the logout confirmation page, Then I should be redirected to the platform home page.
AC-03	Given I have logged out, When I press the browser Back button, Then previously viewed account pages should not be accessible and I should be redirected to the login page.
AC-04	Given I have logged out, When I attempt to navigate directly to a protected URL such as My Account, Then I should be redirected to the login page and denied access without re authenticating

AC-05	<i>Given</i> I am logged in across multiple tabs in the same browser, <i>When</i> I log out from any tab, <i>Then</i> all other open tabs should automatically terminate the session and redirect to the login page.
AC-06	<i>Given</i> I am logged in on multiple browsers simultaneously, <i>When</i> I log out from one browser, <i>Then</i> the session in the other browser should also be terminated and redirected to the login page.

OC-LOG-US-006

Login Performance

As a returning customer, I want the login process to be fast and resilient, so that I can access my account without delays or interruptions..

AC ID	ACCEPTANCE CRITERIA
AC-01	Given I have entered valid credentials and clicked Login, When the system processes the request under normal load, Then authentication and redirection should complete within 3 seconds.
AC-02	Given I have entered valid credentials and clicked Login, When the network connection is unavailable, Then the system should display an appropriate connection error and prompt me to check my internet connection and try again.

OC-LOG-US-007

Input Security

As a returning customer, I want the system to protect my login inputs from malicious attacks, so that my account and data remain secure.

AC ID	ACCEPTANCE CRITERIA
AC-01	Given I have entered SQL injection patterns into any login field, When I click Login, Then the system should reject or sanitize the input, no database error should be exposed, a generic validation message should be shown, and the application should remain stable
AC-02	Given I have entered XSS payloads into any login field, When I click Login, Then the input should be sanitized or rejected, no script should execute, no alert should appear, and no executable code should be stored.
AC-02	Given I am typing in the Password field, When I enter any character, Then it should appear masked and no plain text should be visible at any point.

OC-LOG-US-009

Form Usability

As a returning customer, I want the login form to be clear and easy to interact with, so that I can complete login without confusion.

AC ID	ACCEPTANCE CRITERIA
AC-01	Given I have submitted the form with one or more invalid fields, When validation fails, Then a clear and specific error message should appear near the relevant field, describe the issue without exposing system logic, and use sufficient color contrast to be readable.

AC-02	Given I am on the Login page using Chrome or Edge, When the page loads, Then a custom password visibility toggle should be visible next to the Password field.
AC-03	Given I am navigating the Login page using keyboard only, When I press Tab, Shift+Tab, or Enter, Then focus should move logically through all fields, pressing Enter on the Login button should submit the form, a visible focus indicator should be present on every interactive element, and no keyboard trap should occur.

OC-LOG-US-009	Responsive Design & Browser Compatibility
---------------	---

	<i>As a returning customer, I want the Login page to display and function correctly on any device or browser, so that I can log in regardless of how I access the platform.</i>
---	---

AC ID	ACCEPTANCE CRITERIA
AC-01	Given I have entered SQL injection patterns into any field on the Register Account page, When I click Continue, Then the system should reject or sanitize the input, no database error should be exposed, a generic validation message should be shown, and the application should remain stable.
AC-02	Given I have entered XSS payloads such as <script>alert(1)</script> into any field, When I click Continue, Then the input should be sanitized or rejected, no script should execute, no alert popup should appear, and no executable code should be stored.
AC-03	Given I am entering characters into the Password or Password Confirm field, When I type any character, Then it should appear masked and no plain text should be visible at any point.

DEFINITION OF DONE

✓	All Acceptance Criteria passed
✓	No Critical / High defects Open
✓	Cross-browser compatibility verified
✓	Performance meets SLA
✓	Security checks passed
