

User Story Specification

OpenCart Platform — Shopping Cart & Checkout

Module: Cart & Checkout

OC-CART-US-001 Add Product to Cart

As a site visitor, I want to add products to my shopping cart from different pages so that I can collect items I wish to purchase.

Acceptance Criteria

AC #	Criteria
AC-001	Given I am on the Home Page, When I click 'Add to Cart' for any product (e.g., MacBook or iPhone), Then the product is added successfully and a success message is displayed.
AC-002	Given I am on the Apple Cinema 30" product page and I select all required options, When I click 'Add to Cart', Then the product is added successfully and a success message is displayed.
AC-003	Given I navigate to Tablets and open Samsung Galaxy Tab 10.1 (Pre-Order), When I click 'Add to Cart', Then the product is added successfully to the cart.
AC-004	Given I add products from multiple categories, When I navigate to the shopping cart, Then all selected products appear with correct details, quantities, and prices.
AC-005	Given I search for a product (e.g., MacBook) and open it from search results, When I click 'Add to Cart', Then the product is added correctly to the cart.
AC-006	Given I am not logged in (Guest), When I add a product to the cart, Then the product appears successfully in the cart without requiring login.

OC-CART-US-002 Cart Quantity Validation

As a site visitor, I want the cart to enforce valid quantity rules when adding products so that I receive clear feedback and cannot submit invalid quantities.

Acceptance Criteria

AC #	Criteria
AC-001	Given I enter a quantity greater than 1 (e.g., 3), When I click 'Add to Cart', Then the product is added with the entered quantity correctly reflected in the cart.
AC-002	Given the default quantity field on any product page, Then it should display '1' by default and the product is added with quantity = 1.

AC-003	Given I enter quantity = 0, When I click 'Add to Cart', Then the system rejects the input, displays a validation message, and does NOT add the product or show a success message.
AC-004	Given I enter a negative quantity (e.g., -1), When I click 'Add to Cart', Then the system rejects the input and does NOT display a success message.
AC-005	Given I enter alphabetic characters (e.g., 'abc') in the quantity field, When I click 'Add to Cart', Then the system rejects the input and does NOT display a success message.
AC-006	Given I enter special characters (e.g., '@#') in the quantity field, When I click 'Add to Cart', Then the system rejects the input and does NOT display a success message.
AC-007	Given I enter a very large quantity (e.g., 9999), When I navigate to the cart, Then the system either adds it within a defined limit OR displays an appropriate validation message.
AC-008	Given I enter a decimal quantity (e.g., 1.5 or 1.6), Then the system either rejects it with a validation error or applies consistent and documented rounding rules without crashing.

OC-CART-US-003 Product Required Options & Date Validation

As a site visitor, I want to be required to select all mandatory product options and valid dates before adding to the cart so that I cannot submit an incomplete or invalid product configuration.

Acceptance Criteria

AC #	Criteria
AC-001	Given I am on the Apple Cinema 30" page and I do not select any required options, When I click 'Add to Cart', Then validation error messages are displayed for all required fields and the product is NOT added.
AC-002	Given I select a past date in a date field on any product page, When I click 'Add to Cart', Then the system should reject past dates and display a validation error.
AC-003	Given I am on the HP LP3065 page and I leave the Delivery Date field empty, When I click 'Add to Cart', Then the system displays 'Delivery Date required!' and the product is NOT added.
AC-004	Given a product dropdown has required options, When I click 'Add to Cart' without selecting an option, Then the system displays 'Select required options' and does not add the product.

OC-CART-US-004 Cart Management & Updates

As a site visitor, I want to manage my cart by updating quantities, removing items, and seeing accurate totals so that I have full control over my cart before checking out.

Acceptance Criteria

AC #	Criteria
------	----------

AC-001	Given I add the same product twice, When I view the cart, Then the product quantity is updated to 2 instead of being listed as two separate entries.
AC-002	Given I add multiple products, When I view the cart, Then the displayed total price equals the correct sum of all added product prices.
AC-003	Given I add a product, When I click the shopping cart icon in the header, Then the cart page is accessible and displays the added product with correct name, quantity, unit price, and total.
AC-004	Given I have a product in the cart, When I click 'Remove' or 'Delete', Then the product is removed and no longer appears after page refresh.
AC-005	Given I manually change the quantity of a product in the cart (e.g., 1 → 3), When the update is applied, Then the cart total and quantity update correctly.
AC-006	Given I add two different products, When I view the header, Then the cart icon correctly shows the number of items and combined price.
AC-007	Given no products are in the cart, When I navigate to the shopping cart page, Then the message 'Your shopping cart is empty!' is displayed.

OC-CART-US-005 Out of Stock & Availability Handling

As a site visitor, I want to be informed when products are unavailable or out of stock so that I cannot mistakenly add them to my cart or proceed to checkout.

Acceptance Criteria

AC #	Criteria
AC-001	Given a product is marked as 'Out of Stock', When I click 'Add to Cart', Then the system should NOT allow adding the product and should display an appropriate unavailability message.
AC-002	Given a product in the cart has unavailable quantity or out-of-stock status, When I attempt to proceed to checkout, Then the system blocks checkout and displays: 'Products marked with *** are not available in the desired quantity or not in stock!'

OC-CART-US-006 Cart Persistence & User Account Integration

As a registered user, I want my cart items to be saved to my account and persisted across sessions so that I do not lose my selections when I log out and back in.

Acceptance Criteria

AC #	Criteria
AC-001	Given I am logged in and I add a product to the cart, When I log out and log back in with the same account, Then the cart items are still available and correctly displayed.

AC-002	Given I am a guest user with products in my cart, When I log in with valid credentials, Then the guest cart items are merged with my account cart and all products are visible without data loss or duplication.
---------------	--

OC-CART-US-007 Checkout Flow & Navigation

As a site visitor, I want to proceed smoothly from the cart to checkout so that I can complete my purchase with a clear and uninterrupted flow.

Acceptance Criteria

AC #	Criteria
AC-001	Given I have at least one product in the cart, When I click 'Checkout', Then I am successfully redirected to the checkout page without errors.
AC-002	Given the cart is empty, When I click 'Checkout', Then the system blocks checkout and displays a message indicating the cart is empty.
AC-003	Given I am on the checkout page and click the browser Back button, When I navigate back to the cart page, Then cart data remains unchanged and previously added products are still present.
AC-004	Given I navigate through Cart, Checkout, and Order Confirmation pages, Then the page title and URL update correctly to reflect each step.

OC-CART-US-008 Checkout Billing Details & Validation

As a site visitor, I want the checkout form to validate all required billing fields before proceeding so that I am clearly guided to provide complete and valid information.

Acceptance Criteria

AC #	Criteria
AC-001	Given I leave required billing fields empty (First Name, Last Name, Email, Telephone, Address), When I click 'Continue', Then validation messages are displayed for all mandatory fields and checkout does not proceed.
AC-002	Given I enter an invalid email format (e.g., 'abc@'), When I click 'Continue', Then the system displays a validation error and does not allow proceeding.
AC-003	Given all billing details are filled and I reach the payment section, When I do NOT check the Terms & Conditions checkbox, Then the system prevents order confirmation until T&C is accepted.
AC-004	Given billing details are completed and a product is in the cart, When I reach the delivery method section, Then Flat Shipping Rate (\$5.00) is pre-selected by default.

OC-CART-US-009 Payment & Order Placement

As a registered user, I want to select a payment method and place my order successfully so that I receive an order confirmation and can track my purchase.

Acceptance Criteria

AC #	Criteria
AC-001	Given all billing details are filled and a valid payment method is selected, When I click 'Confirm Order', Then the system places the order and displays: 'Your order has been placed! Your order has been successfully processed!'
AC-002	Given I complete all checkout steps, When I reach the payment section, Then at least one available payment method is displayed.
AC-003	Given I have successfully placed an order, When I navigate to My Account > Order History, Then the order appears with correct product, quantity, price, and status details.

OC-CART-US-010 Product Details Display

As a site visitor, I want to view accurate and complete product information on the product page before adding items to the cart so that I can make an informed purchase decision.

Acceptance Criteria

AC #	Criteria
AC-001	Given I navigate to any product page, When the page loads, Then a valid product image and a clear product name are displayed before I can add it to the cart.
AC-002	Given I add a product with a specific quantity to the cart, When I view the shopping cart, Then the cart displays the correct product name, quantity, unit price, and calculated total price.

Definition of Done

- ✓ All Acceptance Criteria passed
- ✓ No Critical / High defects open
- ✓ Cross-browser compatibility verified (Chrome, Edge)
- ✓ Cart quantity BVA and EP scenarios validated
- ✓ Checkout flow tested end-to-end for guest and registered users
- ✓ Out-of-stock and unavailability messages verified
- ✓ Security checks passed (SQL Injection, XSS)
- ✓ Usability and keyboard accessibility verified
