

TEST Closure Report

Document ID	OC-Test Closure	Version	1.0
Project	OpenCart Platform	Status	Ready for Review
Prepared by	Mohamed Ahmed		

Table of Contents

1. Executive Summary.....	1
2. Testing Scope.....	1
3. Manual Testing Results.	4
4. Database Testing Results.....	3
5. UI Automation Results.....	4
6. API Testing Results.....	3
7. Risks & Recommendations.....	4

1

Executive Summary

This report documents the final status of all testing activities performed on the OpenCart e-commerce platform across four independent testing layers: Manual Testing, Database Testing, UI Automation, and API Testing. Testing has been completed and the project is ready for final sign-off review.

Testing Layer	Total TCs	Pass	Fail	Blocked	Pending	Pass Rate
Manual Testing	358	294	59	4	1	82%
Database Testing	30	22	8	0	0	73%
UI Automation	18 classes	Implemented	-	-	-	-
API Testing	21	16	5	0	0	76%
TOTAL	427	332	72	4	1	77%

2

Testing Scope

Application Under Test: <https://awesomeqa.com/ui/index.php?route=common/home>
Testing Period: Completed May 2026
Modules Covered: Registration, Login, Forgot Password, Search, Category Navigation, Product Comparison, Wishlist, Shopping Cart, Checkout, Currency Selector, Database Schema & Integrity, REST API Endpoints
Out of Scope: Admin panel back-end configuration, payment gateway live transactions, third-party integrations.

3

Manual Testing Results

3.1 Overall Metrics

Metric	Value
Total Test Cases	358
Executed	357
Not Executed (Pending)	1

Metric	Value
Pass	294
Fail	59
Blocked	4
Pass Rate	82%
Fail Rate	16%
Execution Rate	98%

3.2 Priority Distribution

Priority	Count	Description
P0 – Blocker	7	Must fix before release
P1 – High Risk	181	Critical business functionality
P2 – Medium Risk	121	Important but workaround exists
P3 – Low Risk	49	Minor / cosmetic

3.3 Module-Level Breakdown

Module	Total	Pass	Fail	Blocked	pending	Pass Rate
Registration	79	61	18	0	0	62%
Login	43	34	5	4	0	79%
Search	42	37	5	0	0	88%
Category Navigation	37	31	5	0	1	83%
Product Compare	28	28	0	0	0	100%
Wishlist	20	12	8	0	0	60%
Shopping Cart	22	18	4	0	0	81%
Checkout	11	9	2	0	0	90%
Currency Selector	11	11	0	0	0	100%

Module	Total	Pass	Fail	Blocked	pending	Pass Rate
Responsive UI	7	3	4	0	0	42%
Other / Cross-module	58	50	8	0	0	86%

3.4 Defect Summary

Metric	Count
Total Bugs Logged	59
Bugs with Evidence (Screenshots/Video)	59
Critical Severity	3
Major Severity	15
Minor Severity	3
Low Severity	2
Open Bugs (All Priorities)	59
Critical + High Open (must be zero for sign-off)	41

4 Database Testing Results

4.1 Overall Metrics

Metric	Value
Total Test Cases	30
Pass	22
Fail	8
Blocked	0
Pass Rate	73%
Fail Rate	27%

4.2 Priority Distribution

Priority	Count
P0 – Blocker	9
P1 – High Risk	15
P2 – Medium Risk	5
P3 – Low Risk	1

4.3 Module-Level Breakdown

Module	Total	Pass	Fail	Pass Rate
Customer Registration	5	2	3	40%
Order Processing	8	6	2	75%
Shopping Cart	2	0	2	0%
Schema / Database	3	3	0	100%
Coupon Management	2	1	1	50%
Product Catalog	6	6	0	100%
Customer Login	3	3	0	100%
Cart / Order Processing	1	1	0	100%

4.4 DB Defect Summary

Metric	Count
Total DB Bugs Logged	8
Critical / P0+P1 Open	8
Open Bugs (All)	8

5 UI Automation Results

5.1 Framework Summary

Component	Detail
Language	Java 21
Framework	Selenium WebDriver 4.20.0 + TestNG 7.10.2
Design Pattern	Page Object Model (POM)
Reporting	ExtentReports 5.1.1 (SparkReporter)
Build Tool	Apache Maven
Total Test Classes	18
Total Test Layers	3 (Component · Integration · E2E)

5.2 Test Class Distribution

Layer	Count	Classes
Component	11	Register Test, Login Test, Forgot Password Test, Currency Test, Navigation Hover Test, SearchTest, Navigation Test, ComparisonTest, Cart Test, Wishlist Test, CheckoutTest
Integration	6	RegisterThenLogin, LoginSearchCart, LoginCartCheckout, LoginWishlistProduct, Search Compare, CurrencySwitchPrice

E2E	1	E2ETest (13-step full shopping journey)
-----	---	---

5.3 Component Test Coverage

Module	Test Class	Scenarios
Registration	Register Test	Valid registration, missing fields
Login	Login Test	Valid credentials, invalid credentials
Forgot Password	Forgot Password Test	Known email, confirmation message
Currency	Currency Test	EUR / GBP / USD switch + price verify
Navigation Hover	Navigation Hover Test	Mega-menu, subcategory nav
Search	Search Test	Keyword search, results validation
Category Nav	Navigation Test	Category page, breadcrumb
Product Compare	ComparisonTest	Add/compare/remove product
Cart	Cart Test	Add product, quantity change, remove
Wishlist	Wishlist Test	Add to wishlist, unauthenticated redirect
Checkout	Checkout Test	Guest checkout, T&C, order confirm

5.4 E2E Test — 13-Step Journey

Step	Action
1	Currency switch EUR → USD, price verification
2	Top-nav hover, navigate to Tablets category
3	Add product to comparison, verify alert
4	Navigate to Comparison page, remove product
5	Register new account (UUID-generated email)
6	Logout

7	Forgot Password flow with known email
8	Login with newly registered credentials
9	Search for product (HTC Touch HD)
10	Add to cart, verify success alert
11	Wishlist button — verify auth redirect
12	Guest checkout — billing, shipping, payment
13	Verify order confirmation page

6 API Testing Results

Metric	Value
Total Test Cases	21
Pass	16
Fail	5
Blocked	0
Pass Rate	76.2%
Fail Rate	23.8%
Execution Rate	100%

6.2 Priority Distribution

Priority	Count
P0 – Blocker	2
P1 – High Risk	8
P2 – Medium Risk	8
P3 – Low Risk	3

6.3 Module-Level Breakdown

Module	Total	Pass	Fail	Pass Rate
Authentication	4	3	1	75.0%
Cart	8	5	3	62.5%
Customer	2	2	0	100%
Order	2	1	1	50%
Currency / Token	4	4	0	100%
Shipping	1	1	0	100%

7 Risks & Recommendations

7.1 Critical — Block Release Immediately

RISK-01 | SQL Injection in Registration Form OC_AUTH_BUG_001 · P0 Registration accepts ' OR '1'='1 as a valid First Name and stores it in the database. Classic injection attack vector — attacker can manipulate queries or extract customer data. *Fix:* Server-side whitelist validation (letters only) + parameterised queries + WAF rule. Retest against OWASP Top 10 before sign-off.

RISK-02 | NULL Password Stored in Database OC_DB_BUG_001 · P1 oc_customer table has customer_id = 102 with a NULL password — account exists with no credentials. Schema gap, not just an app bug. *Fix:* Alter column to NOT NULL. Audit all records for NULL/empty passwords. Trace the code path that allowed partial commit without rollback.

RISK-03 | API Returns [] on Authentication Failure OC_API_BUG_001 · P0 POST /api/login with invalid key returns empty array instead of error object. Any integration checking for error property will silently pass a failed auth as success. *Fix:* Enforce consistent error envelope { "error": { "warning": "..." } } on all failure paths. Add contract tests to Postman collection.

7.2 High — Fix Before Next Release

RISK-04 | Cart API Ignores Missing Quantity Field OC_API_BUG_002 · P1 POST /api/cart/add succeeds with no quantity in the request body — cart state becomes unpredictable, affects inventory and billing downstream. *Fix:* Reject request with HTTP 422 when quantity is absent or zero.

RISK-05 | Wishlist Module — 60% Fail Rate 8/20 TCs failing · P1 Highest failure rate across all modules. Failures in authentication redirect and state persistence. Wishlist is a direct conversion driver — silent item loss after login redirect is the most damaging scenario. *Fix:* Root-cause analysis on the 8 failing cases. Priority on any scenario where wishlist item disappears post-login.

RISK-06 | Responsive UI — 57% Fail Rate 4/7 TCs failing · P2 Layout and functional failures on non-desktop viewports. Mobile is the majority of e-commerce traffic. *Fix:* Identify affected breakpoints. Add Selenium viewport tests to catch regressions automatically.

7.3 Medium — Schedule for Next Sprint

RISK-07 | Name Fields Accept Numerics & Special Characters OC_AUTH_BUG_003/004 · P1 Pollutes customer data, breaks PDF invoices and email personalisation. *Fix:* Regex `^[A-Za-zÀ-ÿ' -]{1,32}$` — client-side UX + server-side enforcement

RISK-08 | 4 Blocked Login Test Cases P2 Security-critical module with untested paths — any blocked test in Login is a gap, not just a metric. *Fix:* Document the blocker per case, resolve environment dependency, execute before sign-off.

RISK-09 | Order API Accepts Empty Cart P1 Zero-item orders not rejected at API level — business rule enforced only by UI. Any direct API caller bypasses this completely. *Fix:* Add pre-condition check in order endpoint: reject if cart is empty with HTTP 422.

7.4 Sign-Off Recommendation

Project is NOT ready for production release. 4 P0/Critical bugs remain open across Manual and API layers. Zero P0 bugs is a mandatory exit criterion. A focused regression sprint targeting RISK-01 through RISK-03 is required before final sign-off.
